

DIABETIC FOOT ULCER – CLINICAL TRIAL

**TIME DOES NOT HEAL ALL WOUNDS.
DON'T WAIT, CALL US TODAY.**

Did you know that most foot amputations in patients with diabetes occur due to a non-healing foot ulcer?

Texas Heart Institute is part of a clinical study of an investigational product that may improve healing of diabetic foot wounds for patients with Peripheral Arterial Disease (PAD).

You must be between the ages of 18 to 80 to participate, have diabetes and a foot ulcer.
