All is in Flux:
Journeys in Cardiac Metabolism

Heinrich Taegtmeyer, MD, DPhil
Professor, Cardiovascular Medicine
The University of Texas Health Science Center (UTHealth)
McGovern Medical School
Houston, Texas

February 21, 2020, 12:00 p.m.
Denton A. Cooley Auditorium
Room C060

This presentation will discuss the importance of metabolic cycles and offer new perspectives of improving energy transfer in the failing heart.

At the conclusion of this conference, participants should be able to:

• Recognize the complexities of energy substrate metabolism in the heart.
• Recognize the importance of metabolic cycles.
• Gain a new perspective of energy transfer in the failing heart.
